

ALUMINIUM TUBULAR CABLE LUGS

TUBUALR CABLE TWO HOLE LUGS

The PESSRL Aluminum two-hole lugs are designed to provide secure and efficient electrical connections in various industrial and commercial applications. Ideal for use in power distribution systems, heavy machinery, and electrical panels, these lugs feature a dual-hole configuration that allows for a reliable connection to terminals, bus bars, or mounting points. Constructed from ETP grade copper with a purity of 99.96%, it boasts a minimum conductivity of 60% IACS.

- The two-hole design facilitates a stable and robust connection by distributing mechanical stress across multiple points, enhancing the overall reliability and performance of the electrical system.
- Item identification on cable lug
- Material - Aluminium IS 5082

Nominal Cross Section mm ²	PESSRL CAT NO.	Size of Bolt Die	A	C	D	F	B	G	H	K	I	J
