

COPPER FORK CABLE LUG
CRIMPING TYPE TINNED COPPER FORK CABLE TERMINAL END

PESSRL Fork cable lugs are designed for reliable and efficient electrical connections in a variety of applications. Commonly used in industrial machinery, automotive systems, and power distribution networks, these lugs are ideal for connecting cables to terminal blocks, bus bars, or other fixed connections.

- The forked design allows for quick and easy installation by simply slipping over a stud or bolt, making them a convenient choice for maintenance and assembly tasks
- fork cable lugs ensure stable electrical performance and can withstand mechanical vibrations and stresses.
- The terminal barrel is brazed and soft annealed, Which means that the terminal can be crimped either direction.
- All the terminals are tin plated to avoid oxidation and to achieve maximum corrosion protection.
- Material: Copper (ETP) IS 1897
- Finish: Electro tin to BS 1872 (1984)

Nominal Cross Section mm ²	PESSRL CAT NO.	Size of Bolt Die	A	C	D	F	B	H	L-1	J
